

Payne's Highlights

10-11 through 10-15

Math

In math we learned how to read bar graphs, pictographs, and concrete graphs. We learned key words to look for in word problems like "how many more" and "altogether". We reviewed rounding to the nearest tens place. Next week we will work on addition and subtraction. Next week's flashcards will be adding doubles.

Reminder

- Monday, October 18th-PTA Art Night at 6:30-7:30 and Book Fair 5:30-7:30

Please send in a folder for music class. Children will need a place to put the holiday songs they are learning.

Social Studies

This week we began learning about the contributions of Native Americans. We learned that they gave us respect for nature, legends and stories, jewelry, and farming. Then we began studying the Eastern Woodland region and Powhatan Indians in that area. Ask your child what houses the Powhatan lived in and how they got around.

Yummy Pizzas!

Last week we made English muffin pizzas. Again thanks for all contributions to make it all possible. We made pizzas from Brazil (with peas), Australia (with pineapple) Taiwan (with peaches), and Japan (with potatoes and corn). The kids had fun trying new things, and it was easy to talk about how we are diverse and different.
